

Upgrade Your Neck-Top Computer® with Computer Enhanced Thinking

Brain Friendly technologies to help you think, learn and create

Objective: With the adoption of Deliberate Creative Thinking skills advancing at an increasing rate Mindwerx is always looking for new ways to enhance thinking with technology. We are therefore delighted to present this program on Computer Enhanced Thinking. This workshop style program looks at the practical application of technology to aid individual thinking and significantly improve team collaboration. In it participants will:

- **Look at the nature of their amazing Neck-Top Computer**
- **Explore the concept of Deliberate Thinking** and the discipline of focus
- **Learn the basics of MindGenius** business software that allows you to turn information into knowledge into action.
- **Unleash their genius with iMindMap**, the Official Mind Mapping software approved by Tony Buzan
- **Feel the power of Zing for team collaboration** and see how hundreds of ideas can be captured in minutes, exactly as they were conceived
- **Discuss a range of online systems** that enhance thinking, communication and creativity

Benefits: The human brain is without doubt an amazing super bio-computer, and when powered with Deliberate Thinking methods and technology, the benefits are phenomenal:

- ✓ Plan major projects and other activities in a fraction of the time normally needed
- ✓ Capture and comprehend vast amounts of information relevant to their focus
- ✓ Work creatively individually or in a team
- ✓ Generate winning new ideas related to the task being worked on

Duration: This fast paced half-day workshop is presented by Jennifer Goddard, Master Trainer Buzan Centre: Aust/NZ

Smoothly functioning technology will have the appearance of magic.

...Arthur C Clarke

iMindMap helps you think and work smarter, organize your thoughts and ideas, present information with maximum impact, learn faster and improve your memory."
